Professional Summary

Computer Science (AI & ML) undergraduate at Vardhaman College of Engineering with a strong foundation in Java, C++, Data Structures & Algorithms, and modern web development. Passionate about building scalable software and AI-driven applications through hands-on projects and continuous learning. Recently completed specialized training in Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and Multi-Agent Systems. Seeking opportunities to contribute to software engineering teams while continuously expanding technical expertise.

Education

Vardhaman College of Engineering

2025 – 2029

B.Tech in Computer Science and Engineering (AI & ML) – Current CGPA: 8.4

Hyderabad, Telangana

Sri Chaitanya Junior College

2023 – 2025

Intermediate (MPC) – 1st Yr: 443/470, 2nd Yr: 966/1000

Telangana

Mahabubnagar Grammar School

2023

SSC – GPA: 8.8

Mahabubnagar, Telangana

Technical Skills

- **Languages:** Java, C++, JavaScript, HTML, CSS
- **Core CS:** Data Structures & Algorithms, Java OOP, Object-Oriented Programming
- **AI:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Multi-Agent Systems
- **Developer Tools:** Git, GitHub, VS Code, Overleaf, Canva

Projects

StartupSphere | Product Design & Development

2026

- Designed and engineered a unified platform for founders, integrating idea validation, team building, hackathon discovery, and investor connections into a single workflow
- Led product design and development as part of a B.Tech PDD project, producing a full technical report and presentation for evaluators
- Deployed the platform on Replit with a consistent, custom-branded dark-theme UI

Assignment Freelancing Platform | Web Development

2026

- Developed a platform connecting students with freelancers for academic assignment help, covering listing, matching, and communication workflows
- Implemented a lightweight, budget-friendly architecture optimized for quick deployment and ease of use

Water Purification System | Engineering Design

2025

- Engineered a cost-effective water purification system aimed at accessibility for underserved communities
- Optimized the design by balancing performance, cost, and manufacturability

Training

One-Week STTP: Building AI Agents – From LLMs to Deployable Multi-Agent Systems

2026

Hackathon Participant

- Covered LLM fundamentals, Retrieval-Augmented Generation (RAG), tool calling, multi-agent system design, and agent deployment

Certifications

- HTML & CSS Value Added Course – Scored 91%
- GrabOn Campus Drive – Participation

- STTP Certificate – Building AI Agents (AI/ML Training)

Soft Skills

- Problem Solving • Leadership • Teamwork • Communication • Adaptability • Critical Thinking • Time Management • Continuous Learning
